

Unleash your potential

Placement opportunities with a difference

Help set the standard in leading-edge, technological developments that can make a real difference to international security. With L-3 TRL, you could make a vital contribution to our sophisticated communications solutions that help safeguard people and information worldwide from terrorist threats.

As a fast growing, dynamic company, we are world leaders in the design, development and manufacture of satellite, radio and Internet systems that locate, monitor, defend and secure communications for government and defence organisations worldwide.

Based in Gloucestershire, L-3 TRL has a reputation for technical excellence with a strong commitment to satisfy our customers' needs.

If you have a passion for innovative technology and are currently studying an Electronics & Electrical Engineering, Computer Science or similar degree, we have some excellent one-year placement opportunities to offer.

During a placement year with L-3 TRL, you will be actively

involved in real-time design and development for 'live' projects. Working alongside a diverse range of experienced Engineers, you will gain an insight into project management and selected aspects of integration and debugging. Placements will run from Summer 2011 to Summer 2012.

For placement students who demonstrate strong technical ability with a team player attitude, we also offer sponsorship during your final year(s) at University, with an offer of employment and introductory fee on graduation (Min 2:1).

If you'd like the opportunity to spend your placement year in this dynamic, fast-track environment, please send a copy of your CV together with a cover letter/email detailing your course modules and projects completed so far to:
recruit.trl@L-3Com.com

"TRL was definitely the right choice for my placement year. There was so much to learn during the first six months but I received plenty of support and everyone was very approachable and friendly. I have particularly enjoyed the opportunities to get involved with specific projects including testing and design. My knowledge of the product lifecycle continues to improve on a daily basis."

Zeke Steer, Placement Student, Loughborough University. Zeke has been sponsored for the remainder of his course.

L-3 TRL is an equal opportunities employer. We encourage diversity and welcome applications from all areas of the community.
