

Computer Science (Cyber) and Technical Apprenticeships with L-3 TRL

Help set the standard in leading-edge technology developments that can make a real difference to international security. With L-3 TRL, you could make a vital contribution to our sophisticated communications solutions that help safeguard people and information worldwide from terrorist threats

With the growing global communication network revolutionising the way governments, enterprises and businesses operate, allowing instantaneous transfer of the most sensitive information, our solutions successfully secure and protect the integrity, confidentiality and availability of infrastructure and information, safeguarding against the most complex cyber threats.

Our expertise lies specifically in the following areas: UK Government Grade Network Security, Global Secure Network Communications, and Critical National Infrastructure Security.

Based in Tewkesbury, Gloucestershire, L-3 TRL has a reputation for technical excellence with a strong commitment to satisfy our customers' needs.

We are currently recruiting for three types of Apprenticeships:

- **Advanced Level 3 Apprenticeships in Electrical and Electronic Engineering** - we are looking for enthusiastic individuals who are keen and have an understanding of Electronics and Electrical Engineering. You will have gained strong results in GCSEs with a minimum of grade B in Maths, English and a related Science subject. Good IT skills would be advantageous. A high degree of manual dexterity and hand-eye coordination is required in order to manipulate small product.
- **Advanced Level 3 IT Technicians Apprenticeships** - we are looking for enthusiastic individuals who have a strong concept of Information Technology and Computer knowledge / IT skills. You will have gained strong results in GCSEs with a minimum of grade B in Maths, English and a related Computer / IT subject is essential. You could be involved in a number of different situations in the work place including supporting networking, web support and programming.
- **Higher Level 4 Apprenticeships in Information Security (which includes Cyber Security)** - we are looking for enthusiastic individuals who have A Levels or similar qualifications in preferably a Technology / Computer Science or Engineering base. You will be a proactive, fast learner; able to work both in a team and sometimes alone. The ability to work logically and methodically, often under pressure is paramount. Information Security Apprentices can work in such areas as network security; Information Assurance and secure System Development.

Potential applicants should bear in mind that a higher apprenticeship combines the challenges of higher-level education with full time employment, and should be prepared for the greater volume and level of study than the advanced apprenticeship.

Some of your hobbies might include team sport or a project where you will be able to demonstrate that you have set personal goals, focused on achievement and maintained attention to detail.

Here's what two of our current apprentices have to say:
